

MINUTES OF THE ONLINE MEETING OF 26 NOVEMBER 2025

This meeting is being held again following the previous one (on Monday 24 November 2025), which had to be stopped due to aggressive intervention by the USSAP boxing section. This meeting was therefore held without the USSAP in order to finalise the MOOC.

Note:

Following several weeks of hacking of the MOOC (corrupted links or links to pages that did not correspond to the content, modification of text content), it was decided to transfer all content to the Stando LTD server.

This is a shame, coming two months before the end of the project.

The main thing is that we have found a solution, but from now on we will make sure to include this type of unforeseen event in the list of potential risks associated with the project.

This transfer will take some time and will also depend on the availability of Stando LTD's IT team.

This means that the MOOC presentation event (closing event) will be held in January rather than December as originally planned.

Regarding the latest content:

Stando has sent the case studies and various exercises for the "Analyse" section of each module.

In the colours of the DEBA as well.

The USSAP has not sent anything.

Aux couleurs du DEBA is continuing with the video interviews and their translation into English (which also includes text transcripts in PDF format).

With regard to assessments and case studies, Aux couleurs du DEBA has been using the H5P WordPress plugin until now.

However, it will now have to create an account on the H5P website (to check whether the desired formats are available free of charge) or use Genially (for which it already has a professional account).

Stando will be responsible for integrating their case studies directly into their H5P account and forwarding them to their internal IT team.

Ideally, using translation software such as DEEPL or ChatGPT, Stando will translate its case studies into French (as it has been doing for the English version for Aux couleurs du DEBA).

DEBA will send links to the various pieces of content created by email and will also upload them to the existing file on the drive.

Empowering Educators Through Inclusive Education MOOC

Awareness Raising
Activities and materials aimed at increasing awareness of inclusion issues.

Practical Tools
Tools provided to implement inclusive education strategies effectively.

Essential Content
Comprehensive materials covering key aspects of inclusive education.

Dive into our MOOC, designed like a refined menu blending diversity, inclusion, and intercultural openness. Throughout the modules, you'll discover inspiring interviews, in-depth analyses, diverse testimonials, practical case studies, and interactive quizzes to feed your curiosity and your European appetite. Thematic forums will also allow you to freely share your ideas, questions, and resources — enriching together this banquet of knowledge.
